

CONVEYING SYSTEMS for ENDS, LIDS and CAPS

Efficient production process

Canline has the perfect conveying solutions to ensure a smooth transfer of can ends in your production process, whether it is steel or aluminium. We ensure a smooth transport so products are jointly collected or products are individually separated.

Canline

Canline entered the magnetic and vacuum conveying market some 50 years ago. Especially in the packaging industry Canline is a well known international supplier of transport systems to both manufacturers and filling industries.

We offer a complete range of services in can and end handling, in steel as well as in aluminium, from small conveying projects, individual components and spare parts, up to turnkey projects and regular service contracts.

1. Outfeed distributor to infeed liner
2. Diabolo drive units to push ends
3. Mass transport to conversion press/distributor / palletizer
4. Infeed conversion press
5. 'Angel wings' at outfeed curler
6. Double rope conveyor to seamer
7. Mass conveying from unpacker to seamer
8. Horizontal conveyor to magnetic vertical elevator
9. Horizontal belt conveying
10. Magnetic inverter
11. Single conveying of rings
12. Magnetic elevator creating access for personnel
13. Downstacker
14. Magnetic separation unit
15. Cutter infeed

Company services

- Export worldwide to over 50 countries
- Specialized in customer-specific solutions
- Over 50 years experience in both magnetic and vacuum conveying
- High quality and carefully engineered products
- High speed conveyor systems to move materials quickly and efficiently
- Smooth integration in existing systems
- Extensive technical know-how
- Efficient communication lines
- Innovative engineering, layout development and project engineering
- Experts in professional project management for monitoring, customer co-ordination, producing necessary documentation etc
- Installation, commissioning and after sales support
- Various agencies worldwide
- Wide network of suppliers, resulting in short lead times

Unique Selling Points

- Short delivery times
- Experience with projects in Asia
- Equipped to co-operate with local businesses for installation and assembly
- Compact packaging, reducing transport costs
- We increase production quantities and efficiency and provide trouble-free operation with minimum maintenance
- We reduce damage to products and guarantee an uninterrupted transport of products between work areas
- Own R&D and engineering departments providing the flexibility to develop bespoke products to suit specific requirements
- Experienced and professional engineers to upscale the engineering capacity
- Highly motivated field service engineers with wide experience
